**DESCRIPTION/OPTIONS:** This truck is equipped with a 6-inch lift kit, which raises the suspension to accommodate larger tires and enhance off-road capabilities. This lift increases ground clearance for better maneuverability over obstacles. The F-150 XLT is fitted with 35-inch tall, 12.5-inch wide, 20-inch diameter tires. These larger tires provide improved traction and a more aggressive look. It has running boards installed, which are typically mounted on the sides of the truck for easier access to the cabin. These boards provide a step up, making it more convenient to enter and exit the vehicle. The fender flares, which are extensions on the wheel arches, are painted to match the truck's body color. They not only enhance the truck's appearance but also offer protection against road debris and mud. The Back Up Camera feature assists with parking and maneuvering in tight spaces. The backup camera provides a view of the area behind the truck on the infotainment display, helping the driver avoid obstacles and ensure safety. Overall, the combination of the lift kit, large tires, running boards, painted fender flares, and a backup camera adds to the functionality, ruggedness, and style of the 2016 Ford F-150 XLT.
